I am a satellite radio subscriber, I have two XM components - one for car and one for home. I would be lost without my XM AND the benefit I receive from having weather and traffic available to me without having to wait through 15 obnoxious commercials or hearing the same horribly song for the 20th time that day! It seems to me that if you allow NAB's petition 04-160 you are violating MY rights to have access to information that I deserve! Having traffic and weather updates available to me whenever I need or want them is MY right that should not be taken away from me. If the NAB has a problem XM offering wonderful programming, maybe they (the NAB) should change the way THEY work and alter THEIR programming instead of taking away MY rights! Thank you for your time and I hope you understand that this petition is completely unfair and I along with thousands of other XM radio listeners will NOT sit by quietly and allow this to happen.
